

Research & Development Policy

The research & development in the field of product-Manufacturing, Inspection & Testing is the main focus of the organization to achieve a leading position in the domestic & international market.

- To achieve this, the organization ensures the following: -
 - Continual up gradation of product quality and range.
 - Effective utilization of competent & experienced manpower.
 - By adapting/up grading of the latest technology available in the world, to get good quality product.
 - Developing/upgrading manufacturing & testing facilities in house, to achieve Zero defects in the product manufactured by the organization.
 - Providing training to the employees working in the research & development department, as well as other associated departments to enhance technical knowledge.

The top management is committed to provide all the necessary resources for the research and development, to achieve the above objective.
